

ABOUT ME

Personal Statement

I am a Clinical Programmer and External Data manager with more than eight years of experience. I currently work as a for large contract research organisation, so I have plenty of experience working well with others as part of a team or agency. I am an enthusiastic and dedicated professional with extensive experience across all areas of database management, programming design and development. A proactive individual with a logical approach to challenges, I perform effectively even within a highly pressurised working environment. I am quick to grasp new ideas and concepts, and to develop innovative and creative solutions to problems.
